KRUNAL ZURE

Since graduating, I feel I have used the knowledge learned from my degree every day in my career. I feel BVCHTMS prepared me for what I would face once entering the job market, allowing me to hit the ground running and have success in various roles so far. I currently sit as the Director of Food and Beverage at Meluha The Fern and Rodas, Mumbai. My career has blossomed in Hospitality, solely due to the foundations built at my college level. The core principles taught in this college set me up to understand and implement various analytical methods in the companies I have worked. The degree earned at BVCHTMS will set you up with all the tools needed to have a successful career in any path you follow. I am proud to be a part of such a great institution.

Batch of 2003-2006

Reflecting on the 3 years I spent at BVCHTMS, I have come to realize how fortunate I was to attend College. It was and is my Gurukul which instilled in me good values, discipline and taught me to be a professional. I was blessed to have been surrounded by the best teachers who cared and guided us. My Teachers, like my parents are still guiding us in our Journey. I am blessed to be a part of the BVCHTMS Family

OUTLET MANAGER
THEOBROMA

"It is difficult to articulate how profoundly my time at BVCHTMS helped me to shape the person I am and the decisions I have made. The education I received was spectacular, and the professors gave me unique and intense learning experiences in the fields of Food Production, F&B, and RDM, for which I am incredibly grateful. Professors constantly motivated and guided me in my 3 year journey and are doing so until today. The Institute gave me the endurance to continue through challenges and the confidence to know I was fully equipped to handle whatever those challenges might be."

27th October 2022 to 31st October 2022

This Diwali we had the most immersive and life changing experience at @magadha_vana in Karnataka. We celebrated it with tranquil wild forests and hundreds of different trees and plants in magadha_vana, with more than 80 species of birds chirping around us instead of fire crackers, imbibing the most important life lessons by observing the abundant tranquil nature, most importantly of "giving" and "gratitude", a complete digital detox with most natural and authentic food I have ever had served with so much joy and happiness...

Shiv and Kavan a big salute to you for all that you have achieved at your farm and life. I'm beyond words for your passion, your thoughts about sustainability and nature, your lifestyle 🙏 We are sure coming back for more - you have left us intrigued and amazed, we want to explore so much more at Magadha Vana, near Udupi. 🙏

Chat GPT: Advantages and Disadvantages of Using it

Chat GPT! The word you hear everywhere. It is a buzzword these days in the IT world. People are curious about it as it has the potential to revolutionize the digital world in many ways.

From digital marketers to web developers, and writers, everyone is the beneficiary of this incredible tool. Moreover, it can also assist SMEs as it can quickly generate business documents, including employee contracts, business proposals, financial documents, emails, etc. It is also helpful for students as they can use it to make their assignments error-free.

However, where Chat GPT provides many benefits, it can also harm people in many ways. For example, it can provide factually incorrect data, damage academic integrity, and also pose threats to people's jobs.

This blog will enlighten you about the advantages and disadvantages of Chat GPT. It will help you learn how and how not to use this tool. Let's start with the advantages!

Advantages of Using Chat GPT

There is no doubt in the fact that Chat GPT deserves all the hype that it has got, as it provides a lot of benefits to users. Check out some advantages of using this incredible AI tool:

Time-Saving

The most significant benefit of Chat GPT is that it automates various tasks and helps users quickly get the data they need. For example, if you are a web developer you may have to write hundreds of lines of code to create a website. Writing that code manually may consume much time but if you do the same task on Chat GPT, you can save a lot of your time as it can quickly write the code. Once you get it, you can modify it according to your needs.

Since 1992

BHARATI VIDYAPEETH

University of Mumbai

FACULTY CORNER

COLLEGE OF HOTEL & TOURISM MANAGEMENT STUDIES

Chat GPT: Advantages and Disadvantages of Using it – Page 2

Similarly, it can also help writers create extraordinary content of any kind. Whether you want to write business documents, marketing copy, ads script, or a fictional story, Chat GPT can write it within a few seconds. For that, you only need to provide only a few prompts. The same is the case with SEO experts, marketing, and HR managers; they can save their time with this tool.

Cost-Effective

Apart from saving time, it can save users money. The GPT-3 language tools that were available before were costly, and not everyone could afford them. This tool is much better than its competitors as it can automate more tasks, has excellent speed, provides more accurate data, and, most importantly, is free to use.

Moreover, it saves companies' resources, as when most of the work is automated, the resources can be allocated to managing other business operations. Besides, increasing productivity, it can also provide an incredible ROI. That's why this AI tool is considered the best when it comes to cost-effectiveness.

Great for Learning

Chat GPT is one of the best tools for learning. Chat GPT can help to hone your skills. For instance, if you are or want to become a fiction writer, you can learn a lot about fiction writing using Chat GPT.

For that, provide a story or paragraph you have written in your words, and ask it to rewrite using the style of any of your favorite writers. Chat GPT will do it within a few seconds. Analyze its response, and compare it with your text. You will learn many things, including new words, terminologies, and ways to write a story.

Similarly, using this tool, you can also understand many complicated phenomena. For instance, if you are reading a book filled with jargon, you can write it in Chat GPT and ask it to rewrite in easy-to-understand language.

Chat GPT: Advantages and Disadvantages of Using it – Page 3

Improve Content Quality

Content creators can also use Chat GPT to improve their content quality. Many writers who lack some qualities can perfectly utilize this tool to make their content more impressive and profitable. From finding contextual and grammatical errors, this tool can also improve the overall language of the content.

If you have written content in an ordinary language, you can ask it to improve its language, add expressions, or make it more engaging. It will quickly do it for you. That's why content creators are in love with this tool and frequently use it to improve the overall quality of their content.

Provide Specific Data

Unlike its expensive competitors, Chat GPT provides specific data that users want. It doesn't provide unnecessary information to users. Instead, it focuses on the users' queries and provides the data they need. For example, if you ask for a detailed article on digital marketing, it will only focus on this sort of marketing, not the traditional one.

On the other hand, when you use its competitors, they provide a lot of extra details that users don't need. And sometimes they don't even provide the relevant information. So that's another reason behind the success of this AI tool for content creation.

Disadvantages of Using Chat GPT

No matter how great this tool is, it still has many disadvantages. And here they are:

Ethical Issues

The biggest disadvantage of Chat GPT is that it has created many ethical issues. Using this tool, many content creators generate a lot of content regularly without putting any effort into research. They just put the topic in Chat GPT and ask it to create articles. Once they get the data, they publish it without changing it. That's how they deceive their readers.

Chat GPT: Advantages and Disadvantages of Using it – Page 4

Furthermore, it has harmed academic integrity. As now students can quickly write assignments using this tool, they don't learn anything in their courses. And most importantly, they present that all the assignments are written by themselves.

Promote Cheating

Many universities call this tool CheatGPT as it promotes cheating. Now the students don't copy others' data and make a few modifications to present them as their own. Instead, they just go to the Chat GPT, put in instructions, and create assignments without researching or reading anything.

Many universities have caught their students utilizing this tool during assignment creation. Now they are working on stopping the use of Chat GPT for academic assignments or work.

Doesn't Satisfy Search Intent

GPT content usually doesn't satisfy search intent. This tool is developed to answer users' queries or provide them with the data they want, not to meet users' search intent. It doesn't know your targeted audience, their interests, demographics, etc. It only reads your queries and acts as you ask it to. That's why no matter how good content you develop with this tool, you won't be able to fulfill users' needs with GPT content.

Those who are relying on GPT content are only wasting their time. They should avoid using it for whole content creation. Although they can use it to improve the content, they should avoid using it for writing the whole article.

Factual Inaccuracies

Factual inaccuracies are another disadvantage of this tool. It has very limited knowledge of the recent developments in every field. That's why you should avoid creating all the content with this tool. Otherwise, you may make some blunders, and your readers will quickly realize that you rely on AI, not research or knowledge.

FACULTY CORNER

Since 1992

BHARATI VIDYAPEETH

University of Mumbai

COLLEGE OF HOTEL & TOURISM MANAGEMENT STUDIES

Chat GPT: Advantages and Disadvantages of Using it – Page 5

Due to factual inaccuracies, you may also lose the credibility that you have built throughout your career. That's why it is suggested not to use Chat GPT or any similar AI content creator for writing.

GPT Plagiarism

GPT Plagiarism is another major issue with this tool. In order to stop people from relying on GPT content, many companies have built GPT plagiarism checker tools that analyze the content and find out which sentences are generated by Chat GPT or any other GPT tool. Although their accuracy rate is low, they are still reliable.

To avoid this issue, you can use an article rewriter to rephrase the content and remove GPT plagiarism. These tools make some major changes in the text and make the content look like it was written by humans.

Final Words

Chat GPT is an excellent tool for time and cost saving, writing quality content, generating codes, and improving skill sets. However, totally relying on it can create many problems that can ultimately damage a person's credibility. That's why it is better to use it wisely and not cheat others.

Maharashtra's Sweet Tradition

In 1933, Seth Walchand Hirachand Doshi, an ambitious industrialist, arrived in Barren land with the belief that India could improve its economic condition and free itself of colonial exploitation if it developed its own industries using modern technology. He realized that agriculture, India's single largest industry, would have to partake in this revolution. And then the journey began with purchasing 1,500 acres of barren land and setting about clearing it of rocks and stones, replacing them with fertile soil. He engaged the services of experienced agriculturists, chemists, and engineers. After a decade of persistence, he developed sugarcane in the region and erected one of India's first sugar mills. Around this mill rose a township that provided healthcare, education, and employment to an otherwise remote, rural community. **The Ravalgaon Sugar Farm Limited** was thus incorporated in 1933. In the 1940s, it used some of its sugar output to develop confectionery under the Ravalgaon brand. This was a time when industrialization booming in western countries, A country like France, and Switzerland made automation in the making of their chocolates and candies and Indian confectionery was not even out of their traditional sweets chikki, gajak, etc. Seth Walchand Hirachand Doshi visionary gave birth to this famous brand over 8 to 9 decades ago and still Even after 80 odd years, Ravalgaon Sugar Farm Ltd remains to be one of those few **swadeshi** brands which is not just known for its quality but also for nostalgia.

Maharashtra's Sweet Tradition – Page 2

Those transparent plastic wrappers with yellow, red, and orange colored candies were kept in glass bottles of local grocery stores. When supermarkets were not within reach of the middle class, but as a kid from 80-90 even those candies were the treat for the day, remember that **paan pasand** red and green colored wrapper, and those red stains on tongues? Eating that sweet made us feel like adults as children are not supposed to have paan. Even **Mango Mood**, wrapped in shiny yellow and green wrappers, hit differently as we could savor the taste of mango all around the year.

Doordarshan's Advertisement for this candy was a kind of animated advertisement of that time, as a child so many experiments were done on those candies, like drinking water after eating paan pasand you used to get a feel of drinking cold water and such childish inventions done at that age. From black & White posters and newspapers advertisement and Doordarshan's ads to today's availability on amazon Jio Mart etc. The factory of ravalgaon is ISO22000 certified & it produces ten Products all of them are 100% Vegetarian and Prepared using all-natural gradients like Mango Pulp, milk, coffee Powder, etc

Their iconic posture 'Wise Mothers Choose Ravalgaon Sweets' also made waves in the pre - internet era. It warns against the consumption of confectionery as it can cause 'harm' to children and in the same breath it leaves a healthier and fresher option in their brand

Authenticity has been the key principle of Ravalgaon from the very beginning. The company often works in collaboration with farmers to guide them on using best farming practices and encouraging sustainable initiatives in the factory. So brand loyalty is always been seen for many decades and its results in that in today's global competition where thousands of brands are easily available at the fingertips ravalgaon is also a Molding company for the global market but keeping the taste tradition same.
